Heritage Reports Second Quarter 2019 Results

CLEARWATER, Fla., Aug. 1, 2019 (PRNewswire/ -- Heritage Insurance Holdings, Inc. (NYSE: HRTG) ("Heritage" or the "Company"), a property and casualty insurance holding company, today reported second quarter 2019 financial results.

Second Quarter 2019 Highlights

- Net income for the quarter was \$0.7 million, or \$0.02 per diluted share.
- Record personal lines new business premium and growth rates. Non-Florida states generated 64% of all personal lines new business premium.
- Premiums-in-force were \$922.5 million, down 0.9% year-over-year, reflecting strong new business sales across our platform, offset by strategic derisking in Florida's Tri-County.
- Began writing commercial residential business in New Jersey. Heritage is actively writing personal residential business in twelve states, commercial residential business in two states and has licenses in sixteen states.
- Favorable prior year reserve development of \$1.3 million, representing fourth consecutive quarter of favorable prior year reserve development.
 Net current accident quarter weather losses of \$21.5 million mostly stemming from Florida and North Carolina including \$13.4 million of net current accident quarter catastrophe losses. In the prior year quarter, net current accident quarter weather and catastrophe losses were \$9.4 million.
- Repurchased 157,640 shares for \$2.3 million at a 1% discount to first quarter 2019 book value per share, resulting in total capital returned to shareholders of \$4.1 million, including \$0.06 per share regular quarterly dividend.

Bruce Lucas, the Company's Chairman and CEO, said, "Our second quarter operating results were very strong as we continue to diversify away from Florida, especially the Tri-County region which is highly prone to fraud. Non-Florida states contributed 64% of all personal lines new business premium in the quarter. Premium growth in these states has been rapidly accelerating and reached an all-time high in the quarter. Tri-County claims metrics continue to improve and our percentages of Tri-County claims and litigation have reached an all-time low. Year-over-year, we reduced our Tri-County total insured value (TIV) by \$6.2 billion, but maintained relatively flat premiums-in-force, mainly because of our acceleration in growth outside of Florida.'

Results of Operations

The following table summarizes our results of operations for the three & six months ended June 30, 2019 and 2018 (amounts in thousands, except percentages and per share

Combined ratio	105.0%		98.7%	6	pts	101.3%		90.7%	11	pts

Ratios

Ceded premium ratio represents ceded premiums earned as a percentage of gross premiums earned.

Net loss ratio represents net losses and loss adjustment expenses (LAE) as a percentage of net premiums earned.

Net expense ratio represents policy acquisition costs (PAC) and general and administrative expenses (G&A) as a percentage of net premiums earned. Ceding commission income is reported as a reduction of policy acquisition costs and G&A expenses.

Net combined ratio represents the sum of net losses and LAE, PAC and G&A expenses as a percentage of net premiums earned. The net combined ratio is a key measure of underwriting performance traditionally used in the property and casualty insurance industry. A net combined ratio under 100% generally reflects profitable underwriting results.

Ouarterly Financial Results

Second quarter 2019 net income was \$0.7 million compared to \$2.4 million in the prior year quarter. The decrease primarily reflects a higher net loss ratio stemming from higher catastrophe and non-catastrophe weather losses in the current year quarter.

Gross premiums written were \$254.8 million in second quarter 2019, down 3.3% from \$263.7 million in the prior year quarter. The decrease reflects an 11.9% exposure management driven decline in Florida, particularly in the Tri-County region, partly offset by 8.4% growth outside Florida. Premiums-in-force were \$922.5 million, down 0.9% year-over-year, with the decrease stemming from a 16.3% decline in Tri-County, Florida, partly offset by 6.3% growth outside Florida and 0.8% growth in non-Tri-County, Florida.

Gross premiums earned were \$230.0 million in second quarter 2019, down 0.4% from \$231.0 million in the prior year quarter. The decrease stems from the same items impacting gross premiums written.

The ceded premium ratio was 50.4% in second quarter 2019, down 1.5 points from 51.9% in the prior year quarter. The decrease is primarily attributable to NBIC-related reinsurance synergies and a reduction in NBIC's gross quota share reinsurance program, which decreased from 18.8% to 8.0% as of June 1, 2018 and was eliminated as of June 1, 2019. NBIC's gross quota share reduction was partly offset by additional catastrophe excess-of-loss reinsurance coverage and an increase in NBIC's net quota share reinsurance program from 49.5% to 52.0% as of December 31, 2018.

The net loss ratio was 65.1% in second quarter 2019, up 5.8 points from 59.3% in the prior year quarter. The increase largely relates to higher catastrophe and non-catastrophe weather losses in the current year quarter, partly offset by better reserve development and a lower ceded premium ratio.

The net expense ratio was 39.9% in second quarter 2019, up 0.5 points from 39.4% in the prior year quarter. The increase primarily stems from the favorable impact of NBICrelated purchase accounting on the prior year quarter and reduced ceding commission income in the current year quarter associated with a reduction to NBIC's overall quota share reinsurance programs, partly offset by a lower ceded premium ratio.

The net combined ratio was 105.0% in second quarter 2019, up 6.3 points from 98.7% in the prior year quarter. The increase stems from higher net loss and expense ratios, as described above.

Book Value Analysis

Book value per share increased 3.9% from year-end 2018 to \$14.99 at June 30, 2019.
