Ratios

Ceded premium ratio represents ceded premiums earned as a percentage of gross premiums earned.

Net loss ratio represents net losses and loss adjustment expenses (LAE) as a percentage of net premiums earned.

Net expense ratio represents policy acquisition costs (PAC) and general and administrative expenses (G&A) as a percentage of net premiums earned. Ceding commission income is reported as a reduction of policy acquisition costs and G&A expenses.

Net combined ratio represents the sum of net losses and LAE, PAC and G&A expenses as a percentage of net premiums earned. The net combined ratio is a key measure of underwriting performance traditionally used in the property and casualty insurance industry. A net combined ratio under 100% generally reflects profitable underwriting results.

Quarterly Financial Results

Fourth quarter 2019 net income was \$12.8 million, up from \$3.9 million in the prior year quarter. The increase primarily reflects \$11.3 million of non-core pre-tax charges in the prior year quarter associated with debt refinancing.

Gross premiums written were \$235.4 million in fourth quarter 2019, up 6.2% from \$221.7 million in the prior year quarter. The increase reflects 9.4% growth outside Florida and 3.5% growth in Florida, reflecting positive organic growth across all states and lines of business.

Premiums-in-force were \$940.6 million, representing a 6.1% compound annual growth rate from third quarter 2019. The increase stems from the same items impacting gross premiums written.

Gross premiums earned were \$234.1 million in fourth quarter 2019, basically in line with \$234.0 million in the prior year quarter.

The ceded premium ratio was 44.0% in fourth quarter 2019, down 5.3 points from 49.3% in the prior year quarter. The decrease is primarily attributable to a reduction in overall quota share reinsurance coverage and reinsurance synergies, partly offset by additional catastrophe excess-of-loss reinsurance coverage. Effective December 31, 2019, net quota share reinsurance coverage, which only applies to a portion of the Company's business, increased from 52.0% to 56.0%.

The net loss ratio was 51.0% in fourth quarter 2019, up 70 basis points from 50.3% in the prior year quarter. The increase primarily reflects higher attritional current accident year losses and lower income from vertically integrated operations, partly offset by lower weather-related losses.

The net expense ratio was 38.3% in fourth quarter 2019, up 2.2 points from 36.1% in the prior year quarter. The increase primarily stems from the timing of variable compensation accruals and higher expenses associated with insurance licenses and fees, partly offset by a lower ceded premium ratio.

The net combined ratio was 89.3% in fourth quarter 2019, up 2.9 points from 86.4% in the prior year quarter. The increase primarily stems from a higher net expense ratio, as described above.

Full Year Financial Results

Full-year 2019 net income was \$28.6 million, compared to \$27.2 million for the prior year. The increase primarily reflects higher non-core pre-tax charges in the prior year and lower interest expense in the current year, mostly associated with debt refinancing, partly offset by higher net loss and expense ratios in the current year.

Book Value Analysis

Book value per share increased to \$15.66 at December 31, 2019, up 8.5% from year-end 2018.
